

This is an Executive Summary of one of the ZEBRA-LIFE project deliverables.

D2.1. REPORT ON THE UTILISATION OF LIGNIN FRACTION FOR COSMETIC, FOOD, RUBBER, FUEL & LUBRICANTS (M27)

EXECUTIVE SUMMARY

This document comprises the work done by the different project partners within the framework of Work Package 2 – Additive Product Formulation. A brief description of the scope of this Work Package is provided, followed by a detailed disclosure of the work and efforts carried out in each task. This comprises an introduction to the task, a description of the methodology applied to fulfil it, a compilation of the obtained results and an enumeration of the different challenges found or/and deviations from the expected results.
